CODE 1: Open a website

```
1 package com.example.project1;
2
3 import android.content.Intent;
4 import android.net.Uri;
5 import android.os.Bundle;
6 import android.view.View;
7 import android.widget.Button;
8
9 import androidx.appcompat.app.AppCompatActivity;
10
11 public class MainActivity extends AppCompatActivity {
12
13     @Override
14     protected void onCreate(Bundle savedInstanceState) {
15         super.onCreate(savedInstanceState);
16         setContentView(R.layout.activity_main);
17
18         Button btnOpen = findViewById(R.id.btnOpen);
19
20         btnOpen.setOnClickListener(new View.OnClickListener() {
21             @Override
22             public void onClick(View v) {
23
24                 // Implicit Intent to open a website
25                 Intent intent = new Intent(
26                     Intent.ACTION_VIEW,
27                     Uri.parse("https://www.google.com")
28                 );
29             }
30         });
31     }
32 }
```

```
        startActivity(intent);
    }
}
});
}
```

```

<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
